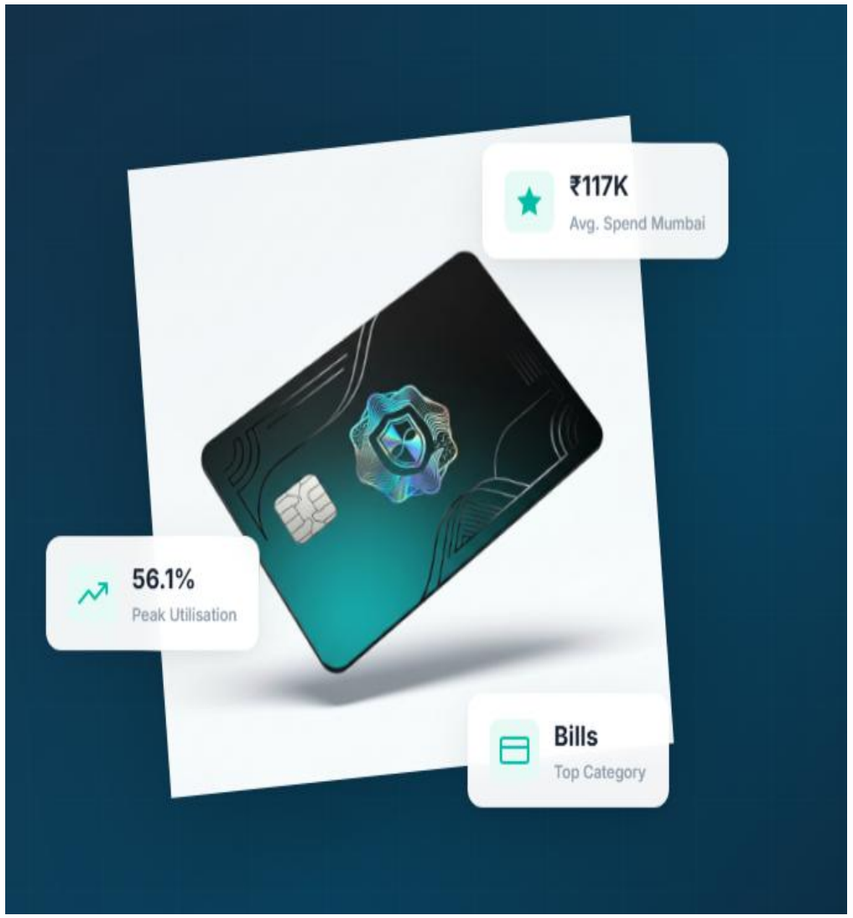
MitronBank

Mitron Bank Dashboard

A strategic analytics project to identify target customers for a new credit card launch



Problem Statement

- **Launch Need**: Mitron Bank was preparing to launch a new line of credit cards.
- **Insight Gap**: It lacked a clear understanding of which customer segments were most likely to adopt and actively use them.
- **Target Segments**: The bank needed to identify the demographic groups with the strongest utilization rates, spending patterns, and overall customer value.
- **Key Factors**: Key factors to analyze included age, city, and profession.

Objectives

- - **Customer Demographics**: Understand age groups, cities, and professions in the customer base.
  - **Credit Utilization Analysis**: Measure how much available credit customers use across segments.
  - **Spending Category Insights**: Identify which purchase types drive the highest transaction volume.
